EDUCATION

Bharati Vidyapeeth (Deemed to Be University)

Navi Mumbai, Maharashtra

Bachelor of Engineering in Computer Science — CGPA: 9.22

2022-2026

Relevant Coursework: Data Structures and Algorithms, Operating Systems, Object-Oriented Programming, Computer Networks, Artificial Intelligence & Machine Learning, Software Engineering, DBMS

EXPERIENCE

Software Developer Intern @ Noice Innovation Labs Pvt. Ltd.

AUGUST-2025

Mumbai, India

- Worked on software development projects involving **C programming**, contributing to the design and optimization of high-capacity data encoding systems.
- Contributed to converting **command-line based barcode generation tools** into **web and mobile responsive applications**, improving accessibility and usability.
- Collaborated with the team on **web service integration**, improving functionality and expanding accessibility of internal tools.
- Strengthened debugging and version control while adhering to **NDA compliance**.

PROJECTS

Text2Tone - Flask, JWT Authentication, PostgreSQL, Text-to-Speech API

2025

- Developed an intuitive text-to-audio conversion platform using Flask, enabling users to convert written content into natural-sounding speech with support for multiple languages.
- Integrated Text-to-Speech APIs and optimized the backend pipeline, reducing audio generation time by 45%.

PriceScope - Web Scraping, Django, HTML & CSS, Bcrypt, ML Model, MySQL

2024

- Built a machine learning-powered web platform to predict house prices using real-time and historical data, helping users make informed property investment decisions.
- Implemented data scraping from housing websites [Makaan.com](#) and cleaned datasets for model training, improving data accuracy by 60%.

WildVision - MobileNetV2, OpenCV, Flask, Python

2024

- Built an Animal classification system using MobileNetV2 and OpenCV, achieving over 90% accuracy on real-world wildlife and domestic animal images.
- Utilized OpenCV for image preprocessing, contour detection, and frame extraction, improving classification reliability by 35%.

TECHNICALSKILLS

Languages: C, C++, JAVA, Python, JavaScript, R

Frontend: HTML, CSS, React.js, Next.js, API Integration

Backend & Databases: Node.js, Flask, Flutter, Django, MongoDB, MySQL

Machine Learning & Deep Learning: CNN, GAN, TensorFlow, Regression and Classification algorithms

DevOps Tools & Others: Git, GitHub, Generative AI, Docker, Celery, RabbitMQ

ACHIEVEMENTS AND CERTIFICATIONS

- Passed the **Python 3.4.3 Test** conducted by IIT Bombay's Spoken Tutorial Project with a score of 70% and earned 4 credits.[\[Certificate Link\]](#)
- Completed **Python for Data Science** 4-week NPTEL course (Jul–Aug 2023) with a consolidated score of 72/100.
